

ONLINE MBA

What are you doing in the next year and a half? You could complete an AACSB-accredited Lerner MBA online to accelerate your career. The Lerner College online MBA curriculum provides you with analytical tools, data and creative skills that improve business decision-making. While the online MBA program offers a broad view of business, courses in international business, strategic leadership, healthcare, business analytics and finance will empower you with the skills and confidence to navigate a dynamic, global economy. You can complete the program in as few as 16 months and see a faster return on your educational investment, or complete the degree at a pace that is best for you. And you can customize your studies to best align with your career aspirations and professional interests.

HIGHLIGHTS

The sample schedules provided above represent just two of the possible scenarios for completing the 44 credits required for the degree. Many variations to these schedules can be customized based on students' start term, academic interests and personal time restraints. Class schedules can vary in future terms and students will need to plan carefully with their academic advisors to maximize their opportunities. The University allows five years from the start of the program to complete the degree.

DEGREE OPTIONS INCLUDE:

Business Analytics

Concentration or Major

Learn to integrate data science, business strategy, and management science to leverage assets, optimize outcomes, and predict future results.

Finance

Concentration

You'll study financial management, analysis and reporting, with added expertise in corporate finance, investment and international finance.

Healthcare Management

Concentration or Major

Learn invaluable skills for today's health systems, including informatics, e-service and patient experience. Choose a major for a deeper focus.

International Business

Concentration

Focus on international business with studies in globalization and international financial management.

Strategic Leadership

Concentration or Major

Strategic leadership goes beyond managing people, encompassing all of the skills and capacities needed to influence groups, manage change, set strategic direction, build teams and support networks and navigate the complex analytical and human dimensions inherent in any leadership role.
