Please include the part number (806-4712-10) of the document in the subject line of your email.
Sun Fire 4810 Fan Trays

The Sun Fire™ 4810 system has three fan trays that collectively cool the system, except for the power supplies, which have their own internal fans. The fan tray locations in the system are labeled FT0, FT1, and FT2. FT1 is the optional fan tray.

Installing a Fan Tray in a Powered-On System

1. Loosen the four captive screws of the filler panel and remove the filler panel and save it.
2. Immediately slide the fan tray into the slot within one minute of removing the defective fan tray.
3. Tighten the four captive screws.
4. Power on the fan tray.

Refer to the Sun Fire 6800/4810/4800/3800 Systems Platform Administration Manual for complete procedures for powering on the fan tray.

Removing a Fan Tray From a Powered-On System

1. Make sure you have a replacement fan tray or filler panel available.
2. Power off the defective fan tray.
   Refer to the Sun Fire 6800/4810/4800/3800 Systems Platform Administration Manual for complete procedures for powering off the fan tray. You DO NOT have to power off the power grids, AC input box, or RTS module(s).
3. Loosen the four captive screws from the defective fan tray.
4. Slide the old fan tray out.
5. Install the replacement fan tray or filler panel.
6. Tighten the four captive screws.
7. Power on the new fan tray.

Refer to the Sun Fire 6800/4810/4800/3800 Systems Platform Administration Manual for complete procedures for powering on the fan tray.

Installing a Fan Tray in a Powered-Off System

1. Use the Sun Fire 6800/4810/4800/3800 Powering the System On and Off Guide to complete the power off steps.
2. Loosen the four captive screws of the filler panel and remove the filler panel and save it.
3. Slide the fan tray into the slot.
4. Tighten the four captive screws.
5. Use the Sun Fire 6800/4810/4800/3800 Powering the System On and Off Guide to complete the power on steps.

Removing a Fan Tray From a Powered-Off System

1. Make sure you have a replacement fan tray or filler panel available.
2. Power off the system.
   Refer to the Sun Fire 6800/4810/4800/3800 Powering the System On and Off Guide to complete the power off steps.
3. Loosen the four captive screws on the defective fan tray.
4. Slide the old fan tray out.
5. Install the replacement fan tray or filler panel.
6. Tighten the four captive screws.
7. Power on the system.
   Refer to the Sun Fire 6800/4810/4800/3800 Powering the System On and Off Guide to complete the power on steps.
