Assignment 6

Due: October 20, 2011

Reading

1. Read chapter 3 from GP.¹

Written work

1. Read problem 4 on page 73 of GP (Karok). Note that [s] in IPA is [ʃ].

Write a concise paper providing a rule-based phonological analysis of the data in this problem. Your paper should focus on the alternations discussed in problem 4. However, your paper should be written in the same manner as the last one (i.e. introduction, generalizations, formal analysis, conclusion). This HW focuses on rules and rule-ordering so please do not provide an OT analysis.
