NAME
ldunld – load or unload a tape device

SYNOPSIS
ldunld [-u | -l ] [-a b.t.l ]

DESCRIPTION
The ldunld program sends a load or unload command to a specified device.

OPTIONS
-a b.t.l  Select a specific ordinal SCSI address, where b is the logical SCSI bus, t is the SCSI target, and l is the SCSI logical unit number (LUN) on that target (see libscsi(8)). This is a required option.
-u  Unloads media from the specified device.
-l  Loads media to the specified device.
