NAME
nsrmon – remotely control NetWorker commands and daemons

SYNOPSIS
nsrmon

DESCRIPTION
The nsrmon command is run only by NetWorker daemons. The command is started by nsrd(8) to remotely control commands and daemons on NetWorker storage nodes running nsrexc(8). Commands and daemons started remotely include nsrjb(8) and nsrmmd(8). See nsr_storage_node(5) for additional detail on storage nodes.

SEE ALSO
nsr(5), nsr_storage_node(5), nsr(8), nsrd(8), nsrexc(8), nsrjb(8) nsrmmd(8)
