Additional Comments:

Responses (8 of 32)

Li-An was overall a great TA and very fair grader. I definitely enjoyed having her! However, some of her math contradicted Professor Panek's which was confusing at times.

Li An is probably the best TA I've had when compared to all my other courses as a freshman. She is always helpful and knows how to answer the math questions presented to her.

Gave clear explanations, should have been stricter about people talking in class as it made it difficult to hear her.

Li An was great

Li An Chen did a great job and helping explain concepts during discussions

Li An Chen conducted a great discussion session, shows more than enough knowledge to teach the discussion section, was tough to understand at first, but it got better over time. She explained each topic very clearly and helped a lot when we had questions.

Sometimes it was hard to understand her explanations of the material and when questions were asked.

Good TA always help me solve questions.
