Li An was very nice and always willing to explain when I had questions.

none

none

Li An was really good at explaining the math labs and discussions. She always had problems ready to go over and for the labs she always had an "answer key" for us to check our answers/ code with. One thing is that she would really go into detail on questions so we didn't get to go over many practice problems- but that also may have been the classes fault since no one spoke up or gave her a reason to move on.

None.

n/a

The TA was a great help in between class meetings. The extra worksheets and step-throughs helped get the point of each module across

she was good but discussions sections were painfully boring

I thought the Graduate assistant was very helpful.

No Additional Comments

Always friendly and was there if we had questions about homework or other questions in general. Helped us understand the material. Helped with some algebra that we might of been missing.

My TA ways always organized and prepared and super helpful with questions about lab! good

Li An always asked us for questions in lab or discussion, and she always explained the answers in a way that wa seasy for me to understand.

She is very helpful and explains the content well. She encourages us to ask questions and always helped me figure out what was wrong with my problems. The sessions were optional but I always attended because she would always help and I would get them all right. An excellent TA, probably my best one

Nothing

very helpful

N/A

I loved TA Li An, always answered all questions and explained things thoroughly when asked. Also great helper to lab!

Thank you

Any issue I had I communicated with my TA and she would respond not only to the best of her ability depending on the situation but in a timely manner.

She was always prepared and explained the topics really well.

He's quite friendly and responsive even in late night(like every engineering student do, haha)

Very informative, always willing to help and made sure we understood every aspect of the material or lab.

Class was run great, with TA and professor working together throughout the semester.

n/a

Li An was very willing to help at all times with any student that needed assistance.

N/A

I have had this instructor as TA for a previous section and my opinion is still the same where she clearly knows what she is doing but sometimes has a difficult time communicating it to students

Accent was harder to understand in the beginning, but I can't fault her for that.

Chen is very kind to help students
