She was very nice and helpful with the lab. She took the time to point out and explain what one was doing wrong.

Good lab work but couldn't understand the connections between what we were doing and how it tied to our major. The work was tied to the class but didn't understand why we needed to learn mathematical code.

Honestly, I barely went but she seemed nice the few times I went.

None

Very helpful in lab, always was able to answer question. Can be hard to understand sometimes though.

Li An was great. She was very open to helping students and answered all of my questions about coding which were a lot because I had never coded before. I probably needed help with every question and she explained them in a way that not only gave me the right answer for lab, but also helped me understand the basics of coding and further understand the concepts were were learning in lecture.

Li An explained the labs well and was open to questions about the software.

Great Instructor, clear and helpful.

Li An made sure everyone understood and completed each lab. Very helpful!
