

Web Pages: Creating and Maintaining

Instructors: Tom Keane (tomkeane@udel.edu)
Mayis Seapan (seapanmj@gmail.com)

Course Objective: At the end of this course the graduates will be able to make a web site of multiple pages, including texts, pictures, and links to music, videos, and other web sites using html and the more advanced CSS coding.

The following describes the material presented in each class.

Week 1 - Introduction: Servers, browsers, folders, and html files.
Create your first web page.

Week 2 – Tags to create and modify texts

Week 3 – More tags to modify texts

Week 4 – Horizontal rules (lines) and colors

Week 5 - Lists

Week 6 - Tables

Week 7 – Linking multiple web pages

Week 8 – Addition of pictures, videos and music

Week 9 – Publishing web pages

Week 10 – Cascading style Sheets (CSS)

Week 11 – More CSS

Week 12 - Forms

Week 13 – Frames and more details
