

Challenging Homework- can you make this page?

This is my 1st web page with some ~~jokes~~ math and science.

What is $(5)^{(2)^3} = ?$ The answer is: $(5)^{(8)} = 390,625$ Clearly $390,625 > 25$.

The chemical formula for alcohol in wine (ethanol) is:

If carbon atoms are isotope 13, the formula will be written as follows:

Corian[®] is a trademark of DuPont company.

The average temperature in summer is $80^\circ \pm 7$, while it is sunny only $\frac{1}{4}$ of the days.
