HTML COLOR CODE

Add color to your web pages in tag options. e.g.:

<Body bgcolor="#RRGGBB">

These are known as RGB codes (Red Green Blue)

Codes are entered in two hexadecimal digits for each color
(1, 2, 3, 4, 5, 6, 7, 8, 9, A, B, C, D, E, F)

The higher the number the greater the color intensity

Codes range from 00 to FF. This allows 256 intensities for each color.

Examples:

Black (No colors) = "#000000"

White (all colors equal) = "#FFFFFF"

Red (Only red) = "#FF0000"

Green (Only Green) = "#00FF00"

Blue (Only Blue) = "#0000FF"

Yellow (Red & Green) = "#FFFF00"

Note! Remember to use quotes and #

HEX CODES FOR "STANDARD" COLORS

White	#ffffff	Maroon	#800000
Yellow	#ffff00	Aqua	#00ffff
Fuchsia	#ff00ff	Lime	#00ff00
